Jon Mendizabal brand book

Brand guidelines · revision 4

The rules for using the Jon Mendizabal identity: the logo and how it is built, the space it needs, how small it may go and what never to do with it; the colours, the type, the icons, the patterns, and the identity in use.

> Note: Made with Jig Studio

The logo

Jon Mendizabal

The horizontal lockup is the primary logo. Every version is derived from one source, so they always match.

Version	Use it for
Icon	Small and square: app icons, favicons, profile pictures.
Wordmark	Where the mark is shown nearby, or the name must lead.
Horizontal	The everyday logo: headers, documents, slides, signatures.
Stacked	Square-ish spaces: posters, title pages, merchandise.
One colour	One ink: stamps, engraving, fax, single-colour print.
Reversed	Dark backgrounds and photos dark enough to read on.

Construction

The logo is drawn on a grid of 10 units (heavier lines every five cells). The blue frame is its bounds; the red points are its named construction points. Its proportions come from these parameters:

Parameter	Value
Line weight	9
Drop size	10

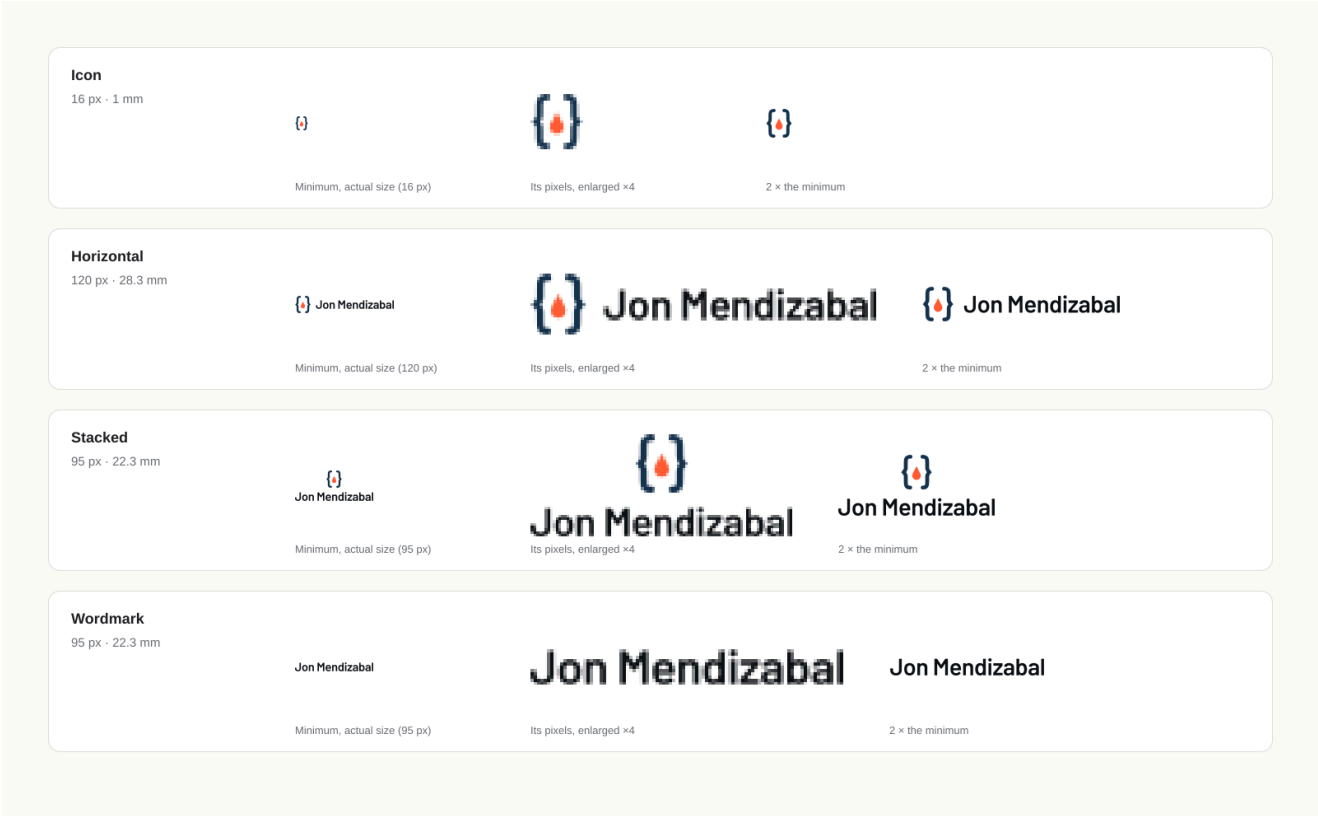

Parameter	Value
Tracking	-15

Clear space

Keep the clear space free of text, pictures and other logos on every side: x = 18.5 units, 23 % of the logo's height. The squares marked x show it at scale. More space is always fine.

Minimum size

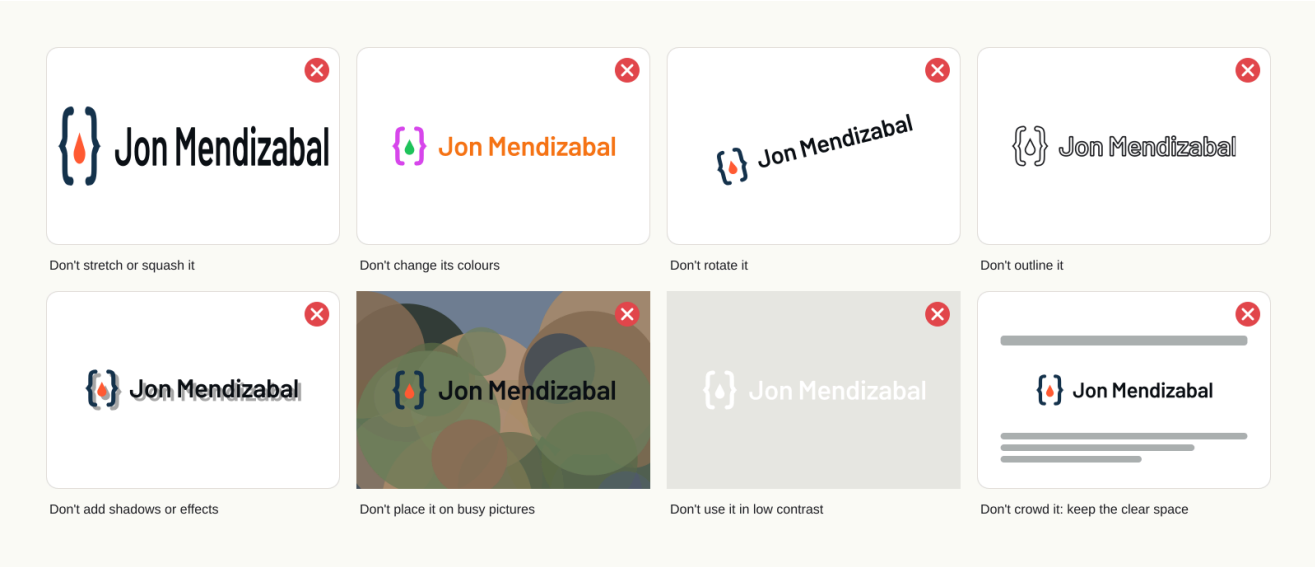

Version	On screen	In print	Set by
Icon	16 px wide	1 mm wide	the thinnest stroke

Version	On screen	In print	Set by
Wordmark	95 px wide	22.3 mm wide	the thinnest stroke
Horizontal	120 px wide	28.3 mm wide	the thinnest stroke
Stacked	95 px wide	22.3 mm wide	the thinnest stroke

Below these sizes the thinnest parts drop under a pixel on screen (0.1 mm in print) and the logo breaks up. Use the icon where space is smaller.

Misuse

Use the logo only as supplied. Never redraw, stretch, recolour, rotate, outline or decorate it, never set it on a busy picture or in low contrast, and keep its clear space.

Colour

Colour	HEX	RGB	HSL	CMYK (approximate)
primary	`#16324F`	22, 50, 79	211° 56% 20%	C 72 M 37 Y 0 K 69
accent	`#FF5C35`	255, 92, 53	12° 100% 60%	C 0 M 64 Y 79 K 0
ink	`#0E1116`	14, 17, 22	218° 22% 7%	C 36 M 23 Y 0 K 91
paper	`#F3F2EE`	243, 242, 238	48° 17% 94%	C 0 M 0 Y 2 K 5

> **Warning: CMYK is approximate**
>
> Approximate: converted from sRGB by formula, without a printer's ICC profile. Ask the print shop for a proof; coated and uncoated paper differ.

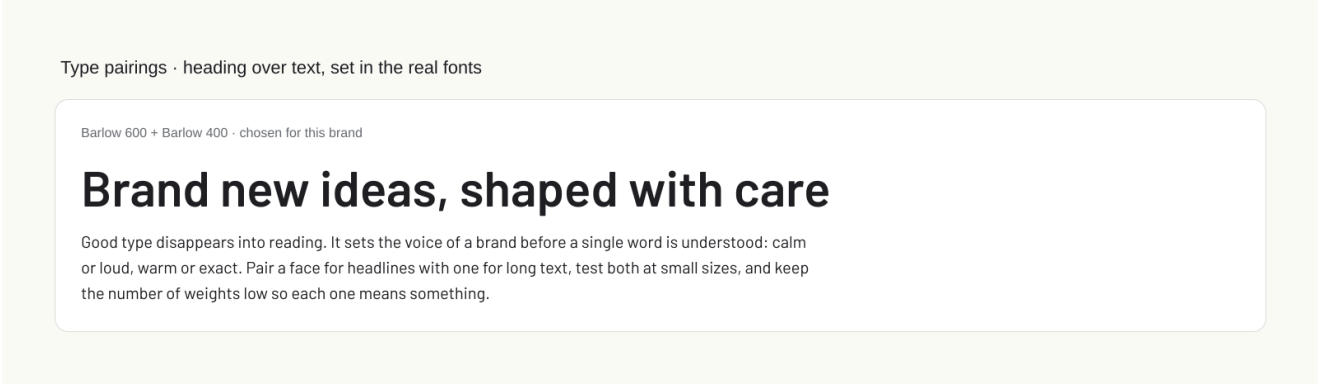

Text and background

Body text needs WCAG AA (4.5 : 1) and APCA Lc 75 or more; large text 3 : 1 and Lc 60.

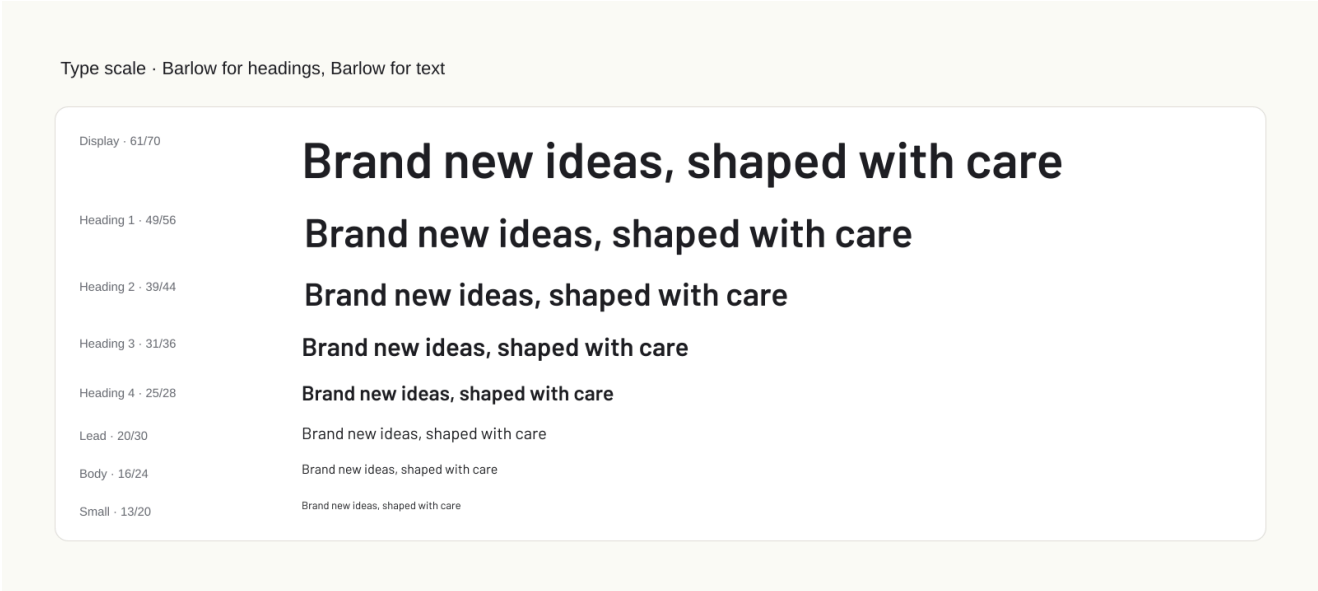

Text	On	WCAG	Level	APCA Lc
paper	ink	16.88 : 1	AAA	-98.8
ink	paper	16.88 : 1	AAA	97.6
paper	primary	11.69 : 1	AAA	-93.9
primary	paper	11.69 : 1	AAA	91.4
ink	accent	6.15 : 1	AA	46.8
accent	ink	6.15 : 1	AA	-44.7
primary	accent	4.26 : 1	AA large	40.7
accent	primary	4.26 : 1	AA large	-39.8

Typography

Family	Role	Weights	Licence
Barlow	Logo, headings and text	400, 600	From Google Fonts, under the SIL Open Font License 1.1: https://raw.githubusercontent.com/google/fonts/main/ofl/barlow/OFL.txt

Type scale

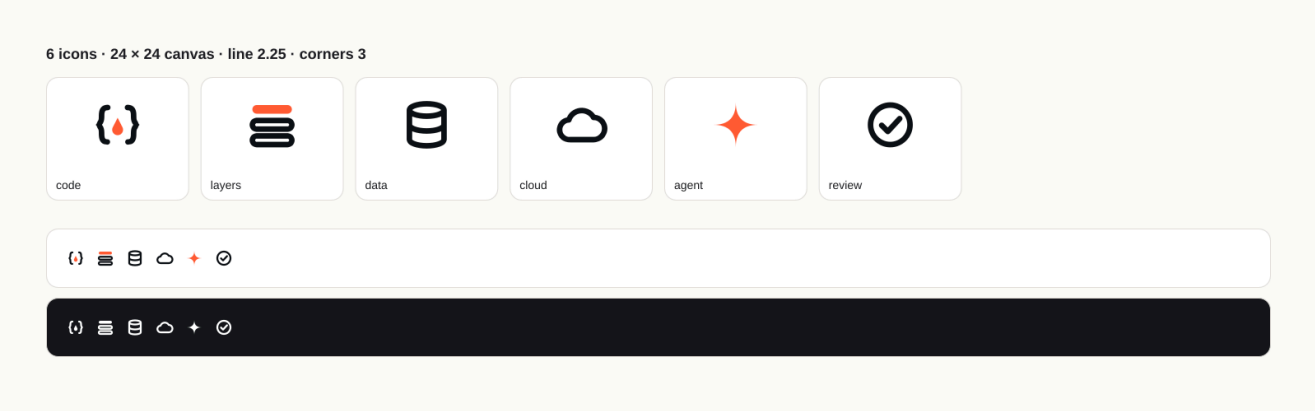

Style	Size	Line height	Weight	Face
Display	61 px	70 px	600	Heading
Heading 1	49 px	56 px	600	Heading
Heading 2	39 px	44 px	600	Heading

Style	Size	Line height	Weight	Face
Heading 3	31 px	36 px	600	Heading
Heading 4	25 px	28 px	600	Heading
Lead	20 px	30 px	400	Text
Body	16 px	24 px	400	Text
Small	13 px	20 px	400	Text

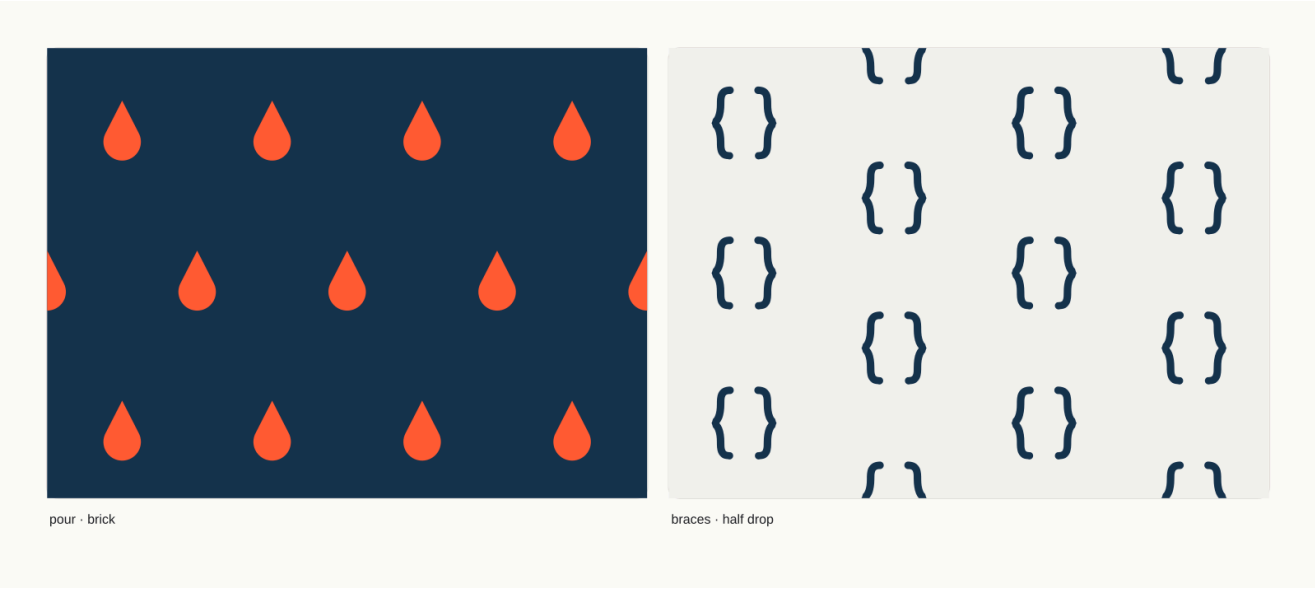

A modular scale at 1.25 from a 16 px body. Keep to these steps and to two weights per face, so each one means something.

Icons

6 icons drawn on a 24 × 24 grid with a 2-unit margin, a 2.25-unit line and 3-unit corners, the same rules as the logo. Draw new icons the same way; never mix in icons from another set.

Patterns

Patterns repeat seamlessly; use them as backgrounds behind the logo's clear space, never behind small text.
